The application submitted to trust lands is incomplete and was returned to the applicant.

>>> Joelle Burns 02/27/03 09:31AM >>>

We received a new notice and permit fee from Fred & Marty Holley for a project located on State lands: NW1/4 NE1/4 NE1/4 of Section 32, T31S, R26E, San Juan County.

The notice states the operator has hired an archaeology survey be performed on the entire 40 acres that he plans to take rock from.

Jim: I will fax the notice and map to you. Thanks for your 10-day turnaround timeframe for this proposed project. Mr. Holley submitted a notice to the BLM which we sent to you earlier. It was located in Section 32, T31S, R26E. You sent a reply saying a survey is recommended because of the high archaeological sensitivity in the area. Now the operator has submitted this notice on SITLA land, rather than pursuing the BLM land notice. We kept the same file number S/037/117 and just changed the location to SITLA land.

John: I will forward copies of the notice and pictures to you for your records (via building mail).

Joelle
